## SUMMARY

---

Results-driven Computer Science graduate and Web Developer with solid experience in web development, automation, and AI-assisted problem solving. Skilled in integrating secure, data-driven systems and optimizing performance across multiple platforms. Possesses strong analytical and technical aptitude with a growing focus on cybersecurity, automation, and system defense technologies. Adept at adapting to fast-evolving digital environments, collaborating across teams, and delivering mission-critical digital solutions aligned with organizational objectives.

## WORK EXPERIENCE

---

### Mid-Level Developer, Skyrocket Studios PH, Inc.

Nov 2022 – Present

- Developed and deployed custom WordPress and Shopify websites optimized for performance and user experience.
- Implemented secure configurations, plugin integrations, and SEO enhancements for client projects.
- Collaborated with design and marketing teams to deliver scalable digital solutions aligned with business goals.
- Applied automation and version control tools to streamline deployment and maintenance workflows.

### Web Developer / Web Designer, DigitYza

Jun 2023 – Dec 2023

- Designed, developed, and maintained WordPress websites tailored for various business clients.
- Enhanced site functionality through plugin customization, responsive layouts, and optimized load performance.
- Conducted quality assurance testing to ensure stability, security, and compliance with client requirements.

### Freelance Web Developer

2021 – Present

- Designed and developed full-stack websites with SEO optimization, plugin integration, and responsive design. Conducted feasibility studies and risk assessments, mitigating potential project risks.
- Partnered with clients to transform technical requirements into secure and efficient digital systems.
- Applied automation tools and AI integrations to improve development workflow and enhance productivity.

## EDUCATION

---

### Bachelor of Science in Computer Science

2015 – 2019

St. Paul Colleges Foundation Inc.

- Focused on software development, network administration, and system security fundamentals.
- Completed academic projects involving database management systems, web programming, and application development.
- Acquired strong background in data structures, algorithms, and systems analysis.

- Conducted a capstone project on developing a secure web-based management system for data monitoring and reporting.
- Gained exposure to network security principles and information assurance practices, forming a foundation for cybersecurity interest.
